

SEEK FOR HOPE HOLIDAYCAMP HAPPY LEARNING PROJECT 2023.

In this end of year activity report to our dears sponsors and partners it's our pleasure to inform you that we managed to end third term peacefully and all our students both in primary and secondary got good marks on their report cards and promoted to the next class. We're grateful for your endless and countless support extended to all our program activities this year and all other year you have been support this cause. In this journey of ensuring access to education of these vulnerable children we applaud you all for enlightening their future .

Further still, we were to utilise the holiday period profitably by empowering these younger souls in the different displines and skills while enjoying their time. In the first place, due to the digital era where computers are integrated almost in all sectors of work worldwide we want to empower them with computer application skills and internet usage to fit the digital evolution especially those in secondary and upper primary, puzzle classes and story sharing for the younger one to build their self-esteem/confidence, Revision of their class work and this is done in discussion groups for the upper primary and seniors, Recreation games for relaxation and energizing during and after sessions and finally Sunday Talks for the adolescents especially girls creating a platform to open up and share experiences(**safe space**) and finding solution

to unanswered questions due to body changes among others and Menstrual Hygiene Management and access to Reusable Sanitary Pads(RUMPs) .

We started these activities on Monday the 4th of September running up to 17th of September, 2023. Please find the attached photos from our Project activities below;

Girls in the inception meeting for the Sunday talks with one our Peer Educator in the community Ms Florence.

Coach Fedia explain the a reusable sanitary pad is used to the younger girls.

Girls After receiving their Sanitary Towels.

Students learning computer application skills.

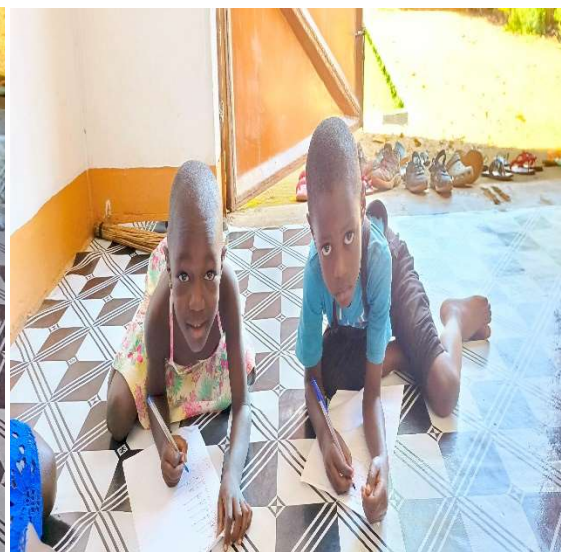

Break Time children enjoying their break tea.

Break time students having break tea.

Revision work for the lower class

Puzzles classes and group discussion for the upper classes.

Games and recreation session to energize and refresh

Message from the program Coordinator

Samuel Kasaku

I express my appreciation to **Seek For Hope** donors and Partners especially **Ms. Andrea Borkovec** who together supported all the Program activities in our community for all the years especially the Education of Vulnerable children so that they can live a better future ahead, training the adolescent girls in menstrual Hygiene Management and provision of Reusable Sanitary Pads (Rumps) together with equipping them with vocational skills .

Seek For Hope has strengthened her presence on different platform and Networks as indicated above. We commit to steer Seek For Hope to greater Heights.
